

Award winners in ISPTS2017

Young Scientist Award

Assistant Professor Dr. Takashi Fujimori (Kyoto University, Japan)

For the excellent study on “Halogenation of Carbon by Trace Metals during Thermochemical Formation of Persistent Organic Pollutants”

Professor Dr. Jianbo Shi (RCEES, CAS, China)

For the excellent study on "Characteristics and Trends of Mercury Pollution in Coastal Areas of China"

Student Poster Award

PS3-4 (Abstract 1059)

Hoa Thanh Nguyen (Ehime University, Japan)

“Gender and life stage differences in effects of prenatal exposure to bisphenol A on the liver transcriptome of rat offspring”

PS1-4 (Abstract 1065)

Erika Goto (Kobe University, Japan)

“Possible metabolic fates of polychlorinated biphenyls by soil bacterium under complex pollution and its structural basis”

PS6-5 (Abstract 1099)

Andreas Libonati Brock (Technical University of Denmark, Denmark)

“Microbial growth yield as a new parameter in environmental chemistry and risk assessment”

PS7-11 (Abstract 1125)

Hiroto Kunishi, (Nagoya University, Japan)

“Selective synthesis of high adsorption capacity sodium titanate for treatment of wastewater containing toxic cation”
